Undergraduate Certificate

- Speech, Language, and Hearing Sciences

In addition to its undergraduate major and minor programs of study, the College of Education and Health Sciences offers a variety of graduate degree programs and certificates. Please see Bradley University's Graduate Catalog for a complete listing.

Global Scholars Program

In the fields of education and health sciences, awareness of global developments and cross-cultural competencies are crucial for respecting and learning from people of other cultures, whether they are patients, students, clients, or colleagues.

The Global Scholars Program (GSP) is designed to prepare professionals for this international state of affairs. The GSP credential can be earned by any student in the College of Education and Health Sciences regardless of major. In addition to enriching the college experience, designation as a Global Scholar helps Bradley graduates stand out in job searches.

When planned early in the college experience, completion of the GSP entails neither additional expense nor additional time to graduate.

Global Scholars will…

- demonstrate increased awareness of and appreciation for cultural, ethnic, and disciplinary backgrounds.
- identify and analyze crucial factors in developing global and cross-cultural communication and attending to issues of diversity in one's chosen profession.
- demonstrate greater awareness of global perspectives in communication, collaboration, diversity, and professional networking.
- collaborate and communicate effectively with colleagues and other professionals within one's own and other cultures.
- demonstrate aspects of international culture and human behavior.

Global Scholars Program Requirements

Bradley Global Scholars complete 17 to 20 semester hours at Bradley University and participate in international/global campus activities, service activities, and internationally focused seminars.

- **World Language**

One to three semester hours approved by the departmental Global Scholar Advisor (e.g., one semester in world language, proficiency equivalency, or an immersion course when studying abroad).

- **Bradley Core Curriculum**

Nine semester hours of Bradley Core Curriculum courses focused on international, human values orientation approved by the departmental Global Scholar Advisor from approved department lists.

- **Departmental International/Multicultural Course**

One three - semester hour course within the student's major.
