

MILITARY SCIENCE

Bradley University is an extension university in partnership with the ROTC program at Illinois State University, providing education and training to Bradley students who desire to earn an appointment as commissioned officers in the United States Army. The goal of ROTC is to commission college graduates into the Active, National Guard, and Reserve components of the Army. Military science classes are conducted at Bradley University and are recorded on the students' Bradley transcripts.

In addition to their academic classes, cadets also complete training classes that incorporate physical training and fundamental Soldier skills. Summer training at Fort Knox, Kentucky, is also required for cadets entering their junior year, and additional voluntary off-campus training is also available as a part of the ROTC experience.

For more information, please contact the College of Liberal Arts and Sciences at (309) 677-2384.

Sequence

To complete the basic course a student must complete:

Code	Title	Hours
M S 101	Introduction to the Army and Critical Thinking	1
M S 102	Introduction to the Profession of Arms	1
M S 201	Leadership and Decision Making	2
M S 202	Army Doctrine and Team Development	2

normally taken in that sequence, over a four-semester period. Exceptions are determined by law and may be discussed on an individual basis with the professor of Military Science at ISU.

Entry into the advanced course requires successful completion of the basic course, basic camp or advanced placement, and acceptance by the professor of Military Science. The advanced course must be completed over a four-semester period, the usual sequence consisting of:

Code	Title	Hours
M S 301	Training Management and the War Fighting Functions	3
M S 302	Applied Leadership in Small Unit Operations	3
M S 401	The Army Officer	3
M S 402	Company Grade Leadership	3
